

### INTERIOR MARBLE CLEANER FOR FLOORS AND WALLS

#### DESCRIPTION AND USE

This unique chemistry is a neutral cleaner with a lot of advantages for interior cleaning. A very mild pleasant odor and non-corrosive non-hazardous components make it safe for both the user and the environment. P.M.C. is capable of removing smoke, heavy finger soils, sealers and waxes, and foot traffic soil without any harm to the marble substrate. Another real benefit of the product is that it does not foam on pickup, so that if you must vacuum the residue you will not waste time clearing foam or de-foaming. All these characteristics make the soap readily disposable to sanitary sewer or easily treated in a waste reclaim system.

#### ADVANTAGES

- \* Renews the surface of the marble without any hazards.
- \* Neutral pH makes the soap personally and environmentally safe.
- \* Low foaming non-emulsifying characteristics make it great for disposal or treatment.

#### LIMITATIONS

- \* The undiluted or highly concentrated product should not be left on a painted surface too long. This can be evened out by reapplication of the product over the area and rinsing properly.
- \* This product may dry out skin if used over prolonged periods of time without gloves.

#### TECHNICAL DATA

Appearance & Odor: Mild odor, colorless  
Physical State: Liquid.  
pH: 7.8  
Vapor Pressure (mmHg): As water  
Vapor Density (air=1): As water  
Boiling Point: 210° F  
Freezing/Melting Point: 32° F  
Specific Gravity (water =1): 1.07  
Evaporation Rate: N/A  
Solubility in water:

#### PRE-TESTING

Always test prior to beginning full-scale cleaning operations. Testing should confirm cleaning effectiveness on each type of surface and stain designated to be removed. Testing also determines the desired dwell time and any potential for adverse reactions with adjacent materials. Allow test panels to dry thoroughly before evaluating final appearance and results.

#### DILUTION

- Use undiluted (straight) up to 50:1 for regular light duty cleaning
- Use undiluted (straight) up to 4:1 for removing smoke damage or sealers
- 4:1 - 20:1 for removing heavy finger soil or foot traffic dirt

#### APPLICATION INSTRUCTIONS

The product may be applied by spray, brush, wipe, or sponge at the recommended dilutions. Agitate as needed or simply allow adequate dwell time on the surface for the soil to be wiped mopped or sprayed away. Rinse depends on surfaces to be cleaned and dilutions. At high dilutions no rinse may be needed but at the stronger concentrations you will need to rinse away the softened soil with a spray or clear mop.

#### COVERAGE RATES

Coverage will be based on dilution.

#### SAFETY INFORMATION

Precautionary Measures: You may wear goggles and rubber gloves when handling this product. Keep off of skin and clothing. If material comes in contact with clothing, wash before reuse. No Hazardous Ingredients. Not regulated by the DOT. Keep container closed when not in use. Dispose of empty containers according to federal, state, and local requirements. Do not remove label. Read Material Safety Data Sheet for additional safety and health hazard information prior to use.

#### SPILL OR LEAK PROCEDURES

Check with the state, local, or federal regulations for waste disposal methods in the area. Wear proper protective equipment while doing cleanup. For large spills, dike and contain for intended use. For small spills, use a chemical absorbent product and place in approved container for disposal.

#### CONTAINER HANDLING/STORAGE

Store the product in a cool, dry place away from acids. Keep container tightly closed when not in use. Do not use pressure to empty container. Wash thoroughly after handling. Do not use container as dilution or rinsing vessel. Empty containers retain residue and must be handled as if full.
