C-TAR MELT

Product Specification
C-TAR MELT

Rinseable Tar Remover

Description and Use
C-Tar Melt is a blend of water soluble, easily rinseable, non-hazardous ingredients. C-Tar Melt is safe for wood, metal, and masonry surfaces and will not raise the grain or cause discoloration of the surface. The product will aid in the separation of tar residue from rinse water if runoff is contained and stored for a short period of time.

Advantages
* Power penetration and softening action
* Biodegradable
* Will not harm the skin. (Constant exposure may cause dryness).

Limitations
* Will cause rubber to swell
* Some softening of the paint may occur (ceases upon rinsing). Always test before prolonged exposure.

Technical Data
Appearance & Odor: White color, hydrocarbon odor.
Physical State: Liquid
pH: 7.5
Vapor Pressure (mmHg): N/A
Vapor Density (air=1): N/A
Boiling Point: N/A
Freezing/Melting Point: N/A
Specific Gravity (water =1): .850
Evaporation Rate: N/A
Solubility in Water: Negligible

Preparation
Protect adjacent and surrounding surfaces from exposure to the cleaning solution when necessary.

Surface & Air Temperatures
Excessively high or low temperatures will produce poor results and possible harm. Best cleaning results are obtained when air and surface temperatures are 40° F or above. Do not clean when temperatures are below freezing or will be overnight. If freezing conditions exist, allow adequate time for surface to thaw. If air temperatures exceed 90° F, flash cool the surface with water before applying product. Do not allow product to dry on a hot surface.

Pre-Testing
Always test prior to beginning full-scale cleaning operations. Testing should confirm cleaning effectiveness on each type of surface and stain designated to be removed. Testing also determines the desired dwell time and any potential for adverse reactions with adjacent materials. Allow test panels to dry thoroughly before evaluating final appearance and results.

Dilution
Use undiluted (straight).

Application Instructions
C-Tar Melt is used straight; do not dilute this product with water. The best method of tar removal from a painted vehicle is by putting a small amount on a cloth and wiping.

For porous masonry, spray-on two applications, one following the other after a 5 minute soak period will sometimes out perform a single application and mechanical removal. Dwell times will vary with thickness of the coating to be stripped. C-Tar Melt can remove many materials in a fifteen minute time span. Craftsmanship determines the appropriate pressures for rinsing. A thorough rinse job is always recommended, however, our chemistry never requires flooding a wall. Pressures that mark or damage the surface should be avoided. When in doubt, follow the manufacturers recommended P.S.I. for the substrate on which you are working. Proper ventilation should always be a consideration when long term exposure will occur. It is recommended that skin contact be kept to a minimum and at least a water rinse be used after contact

Coverage Rates
Coverage rates will vary from 100 - 250 sq. ft. per gallon depending on the surface porosity, texture and severity of staining.

Precautionary Measures
Always wear goggles and gloves when handling this product. Keep off of skin and clothing. If material comes in contact with clothing, wash before reuse. The product contains Petroleum Hydrocarbon. Do not get in eyes, on skin or clothing. Avoid breathing fumes. Keep container closed when not in use. Use with adequate ventilation. Applicators should wear boots, gloves, face shields and/or goggles made of solvent resistant materials to avoid splash to bare skin and eyes. Though the potential for fuming of C-Tar Melt is minimal, take precautions to avoid exposing building occupants to fumes. Dispose of empty containers according to federal, state, and local requirements. Avoid drifting of material or rinse water onto autos and pedestrians by protecting or diverting such traffic. Do not
Rinseable Tar Remover

dilute C-Tar Melt. Do not use for any other applications other than specified. Do not remove label. Read Material Safety Data Sheet for additional safety and health hazard information prior to use.

Spill or Leak Procedures
Check with the state, local, or federal regulations for waste disposal methods in the area. Wear proper protective equipment while doing cleanup. For large spills, dike and contain for intended use. For small spills, use a chemical absorbent product and place in approved container for disposal.

Container Handling/Storage
Store the product in a cool dry place. Vent bung cap before opening. Keep container tightly closed when not in use. Do not use pressure to empty container. Wash thoroughly after handling. Do not use container as dilution or rinsing vessel. Do not cut, grind or weld on or near container. Empty containers retain residue and must be handled as if full.

Instructions in Case of Contact or Exposure
Eyes: Flood with water fifteen minutes. Seek immediate medical attention.
Skin: Wash off with soap and water. If irritation persists, call physician.
Inhalation: Remove to fresh air. If irritation persists, call physician.
Ingestion: Drink lots of water. Seek immediate medical attention.

Notice
This product has been classified in accordance with the hazard criteria of the CFR.

Disclaimer
